The IDS's received 3/6/06 and 12/6/05 have been entered and the priority documents have been received.

A search reveals a stable hard capsule that is water soluble and contains mostly water but does not dissolve internally by containing chloride, also known as a gelling agent, is not taught or fairly suggested by the prior art.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

"Characterized in that" is improper in US claim format. In claim 1 the contents of the capsule are described as having a water content. As claimed, water content is not understood because the water content is expressed as a percent but not a percent of what, such as by weight or volume. Dependent claims should begin with a definite article.

The abstract of the disclosure is objected to because it is more than one paragraph. Correction is required. See MPEP § 608.01(b).

Art Unit: 1657

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
